Abhishek Tiwari

Full Stack Developer — AI/LLM & Payments Systems

Lucknow, India | Open to relocation and remote

+91-7081660941 | abhishektiwari6827@gmail.com | linkedin.com/in/abhishek-tiwariiii | github.com/abhishek6827 | getchintu.com

Summary

Full-stack engineer with 2+ years of experience in **payment infrastructure** (Stripe/Zoho parallel gateway, HMAC-verified webhook pipelines) and **LLM systems** (multi-provider runtime routing). Founder of CHINTU AI, a live multi-LLM SaaS with 500+ registered users and 40+ paying subscribers across Web, Desktop, and Android. Previously sole engineer on 4 production apps and sole owner of payments integration at a fintech platform. Seeking full-stack / backend roles with end-to-end ownership.

Experience

Founder & Full Stack Developer — CHINTU AI *Feb 2026 – Present*
getchintu.com Remote, India

Solo-built and operating a live SaaS platform — 500+ registered users, 40+ paying subscribers

- Built multi-platform clients (React, Electron for Windows/macOS, and Android) and backend services serving 25k+ monthly LLM inferences; engineered runtime routing across Groq, Gemini, and OpenRouter with sub-400 ms fallback, achieving 99.8% uptime.
- Developed asynchronous Python/FastAPI services with RabbitMQ background workers for 63-language audio transcription and usage tracking, maintaining sub-2 s task queue latency under peak loads.
- Implemented Razorpay credit-based billing with webhook-driven entitlement sync, HMAC signature verification, and idempotent transaction processing with 100% reconciliation accuracy.
- Audited response logs to eliminate silent LLM failures (empty streams, unhandled provider timeouts); added structured schema validation and retries, slashing user-facing error rates from 7.2% to $<$0.4%.

Full Stack Developer — Contract (3-month fixed term) *Nov 2025 – Jan 2026*
Indian Capital and Investment (Coimbatore) Limited — fintech investment platform Remote, India

Team of 20 engineers — sole owner of the Stripe/Zoho Payments integration, end to end

- Replaced scheduled polling with a webhook-driven event pipeline, cutting payment-failure detection lag from 20 min to under 3 min; implemented idempotency-key handling and HMAC signature verification across all endpoints.
- Migrated CI/CD to Firebase App Hosting, cutting deployment time from 30 min to under 5 min.

Software Developer *Aug 2024 – Oct 2025*
Vasnaani Sanskaran — early-stage software startup Noida, India

Sole engineer — designed and shipped 4 customer-facing web applications from schema to deployment

- Eliminated N+1 query patterns and added composite indexes on 3 high-traffic endpoints; p95 response time dropped from ∼850 ms to ∼550 ms, confirmed in production server-timing logs.
- Introduced memoized selectors (`reselect`) across 12 Redux-connected components, eliminating full-tree re-renders; measured 25% improvement with React DevTools Profiler.

Full Stack Developer Intern *Jan 2024 – Jun 2024*
Hoping Minds Mohali, India

- Rebuilt performance-critical pages as React components consuming Django REST APIs, raising the Lighthouse mobile score from 68 to 94 and cutting page load time by 22%.

Projects

AI Resume Tailor — Chrome Extension *React, TypeScript, Java, Spring Boot, AWS Elastic Beanstalk, Groq LLM, LaTeX*

- Built a Chrome extension (React) that tailors resumes to job descriptions using the Groq LLM, backed by a Java Spring Boot REST API on AWS Elastic Beanstalk that compiles LaTeX to PDF.

TempoMail — Email Hosting SaaS *Next.js, Node.js, TypeScript, Firebase, Stripe, Zoho Payments*

- 150+ active mailboxes across 3 pricing tiers; processes ∼5k webhook events/month through isolated billing, webhook and delivery microservices, each with its own failure boundary and retry logic.

YouTube Automation — AI Pipeline *Next.js, TypeScript, PostgreSQL, AssemblyAI, Gemini, FFmpeg*

- Automated processing of 300+ videos (AssemblyAI transcription → Gemini Vision tagging), cutting per-video workflow time from ∼45 min to under 4 min with isolated retry logic.

Social Connect — Real-Time Platform *Angular, TypeScript, Node.js, MongoDB, Socket.io, WebRTC*

- Hybrid Socket.io + WebRTC P2P messaging; sustained 200 concurrent sessions under k6 load testing with p99 signalling latency under 90 ms on a single Node.js instance.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL
Frontend & Mobile: React.js, Next.js, Electron, Android, Angular, Redux, Tailwind CSS
Backend & Auth: Node.js, Express.js, FastAPI, Spring Boot, Django, REST APIs, Microservices, RabbitMQ, JWT, OAuth 2.0, RBAC, Clerk
AI & LLM: Multi-LLM Routing, Groq, OpenRouter, DashScope, Gemini, AssemblyAI, Prompt Engineering
Payments & Billing: Stripe, Zoho Payments, Razorpay, Webhook Architecture, HMAC Verification, Idempotency
Databases: PostgreSQL, MongoDB, Firebase/Firestore, Supabase
DevOps & Tools: Git, GitHub Actions, Docker, AWS Elastic Beanstalk, Firebase Hosting, Vercel, Render

Education

Chitkara University, Chandigarh — Master of Computer Applications (MCA) 2022 – 2024
The Bhopal School of Social Sciences (BSSS), Bhopal — Bachelor of Computer Applications (BCA) 2019 – 2022
